Summary

Quality Analyst with experience executing 200+ test cases, improving test coverage by 40%. Proficient in functional, regression, smoke, and sanity testing for web and mobile apps, with API validation using Postman. Reduced data validation time by 92% through efficient planning. Skilled in defect tracking, team collaboration, and maintaining 99% regression pass rates in Agile environments. Focused on delivering high-quality, defect-free releases.

Skills

- Test design and execution: skilled in writing test cases and plans based on requirements
- Functional testing: experience in black-box, UI/UX, localization, and AI/ML testing
- Regression and exploratory testing: proficient in regression cycles and defect discovery
- API testing: worked on REST API validation using Postman
- Defect management: Hands-on with Jira
- Test documentation: capable of creating test cases, bug reports, and RTMs

- Agile practices: active in Agile/Scrum ceremonies
- Data validation: good knowledge of SQL
- Non-functional testing: basic security and performance awareness
- Collaboration and communication: strong team coordination and communication skills
- Automation exposure: familiar with tools like Selenium and Rest Assured using Java

Experience

Hexaview Technologies Private Limited | Noida, India
Software Quality Engineer
07/2023 - Current

Project: Mobex Health App (Aug 2024 - Ongoing)

- Executed over 150 regression test cases weekly, ensuring 99% stability in key modules.
- Achieved 25% reduction in post-production defects through comprehensive functional, performance, and compliance testing.
- Maintained 95% test execution rate during sprints by focusing on high-risk areas, decreasing escaped defects by 30%.
- Identified 85% of critical bugs through early regression testing in over 40 Agile ceremonies before UAT.

Project: Adobe Account and Manage Plan | Admin Console |*IMS (July 2023 - Aug 2024)*

- Leadership & Team Management: Acted as the Single Point of Contact (SPOC) for the project, and led a team of four QA Engineers at Hexaview. Provided mentorship and coordination, enhancing team efficiency, and increasing product reliability by 20%.
- Requirement Gathering and Documentation: Collected daily requirements and user stories from internal QE leads and ensured structured documentation for the QA team. Created a functional test plan and a test matrix to streamline testing processes and improve workflow understanding.
- Globalization & Build Certification: Responsible for certifying builds before release as part of Globalization sign-offs, ensuring localization compliance,

and a seamless user experience across regions.

Deltatech Gaming Private Limited |
Gurugram, India
Software Quality Engineer
01/2023 - 06/2023

- Tested Multiple Gaming Platform for Adda52.com, including Poker, Rummy, and Fantasy Sports.
- Conducted end-to-end testing to ensure product quality and functionality.
- Performed mobile testing on iOS and Android platforms for optimal user experience.
